CONVERT OR 9-10 (SUBMITTED QUESTIONS) AS OF 6-6-2014.

- 1) Note 6 missing on AE101
- 2) Division 11 is in the spec index but not in the spec book. This is the Equipment section and the plans show (4) booms to be installed (AE101) and then it only list (3) in the Equipment Schedule on the plans (QH101). Is the Light/Monitor Boom two booms? It list Anesthesia Boom and Equipment Boom as well as CFCI. I don't see where I can find any information to get a price on these items. Please advise.
- 3) There is a Control Desk with Computer also on the Equipment Schedule (QH101) shown as CFCI and there is nothing in the spec or any details in the plans. I need some more information to be able to price this item. Please advise.
- 4) There are also ceiling speakers and wall mounted clocks shown on the plans (AE1010), but I cannot find any details in the plans or spec for these items. Please advise if I am to price these and where to find the information.
- 5) It is shown on the Finish Schedule (AE601) to paint the ceiling of Clean Core 2B-142 and I cannot tell the limits of where to stop my painting. The Construction Limits are not on a corner and are on the ceiling in the middle of the egress area for surgery staff. When we painted the ceiling two years ago we were able to "feather" in the areas where we added grilles and access panels and I did not know if that was what was expected or is there a stopping point I am not seeing. Please advise.
- 6) In reviewing the specifications, the structural steel framing spec referenced in the index is not in the spec body.

ANSWERS ATTACHED.
